

EDENICS is about **sound** and **sense**—*MUSIC* and *MEANING*—in language. *EDENIC* (Proto-Semitic, best documented in Biblical Hebrew) was HARD-WIRED in the brain of man (since Eden). Its software design matches the hardware **ANATOMY** of **Lips**, **Throat**, **Tooth Ridge**, **Nose**, **Tongue**, and **Whistling Air** (to pronounce the letters/sounds).

Then, in Shinar (*Sumer*, referenced as the later Babel) a neuro-linguistic disturbance was the Big Bang of language dispersion. The single, species-wide human language program was diversified into 70 languages. The ongoing natural breakup of these languages, like Proto-Germanic, have now given us 6000 “languages” (really dialects), like English.

Genesis 11 does not reveal the mechanics of the “confounding” of language at the **TOWER OF BABEL**, but global Edenicists are making great strides in analyzing the ensuing diversity.

First, there were immediate **Sound-Based LETTER SHIFTS** within **7 ANATOMICAL GROUPS**. (Music’s 7 notes are do, ra, mi, fa, so, la and ti.)

- ❑ **Interchangeable Voiceless Vowels:** *Aleph/any Cap Vowel* & **Sometime Vowels;** *Hey/H; Vav/OO or OA; Yod/Y, J or eeY; Ayin/GH* or bracketed [**Cap Vowel**]

א ה ו י ע

- ❑ **Interchangeable Bilabial Letters (LIPS)** ב ו פ *Bet/B, Bhet/BH* or [**V**]; *Vav/V* or **W**; *Pey/P; Phey/PH* or **F**

- ❑ **Interchangeable Guttural Letters (THROAT)** ה ג ח כ ע ק *Hey/H, Gimel/G* or **J**, *Het/[K]H* or **K[H]**, *Kahf/K, Khaf/KH, Ayin/GH* or bracketed [**Cap Vowel**], *Koof/Q*

- ❑ **Interchangeable Dental Letters (TOOTH RIDGE)** ד ט צ ת *Dalet/D, Tet/DT, Tsadi/TS* (always **ST** in European), *Tahf/T, Thaf/TH*

- ❑ **Interchangeable Nasal Letters (NOSE)** מ נ *Mem/M, Noon/N*

- ❑ **Interchangeable Liquid Letters (ROLLING TONGUE)** ל ר *Lamed/L, Resh/R* or **WR**

- ❑ **Interchangeable Fricative/Sibilant Letters (WHISTLING)** ז ס צ ש ת *Zayin/Z, Samekh/\$, Tsadi/TS, Sin/S, Shin/SH, Sahf/(S)* (*Sahf* is a variant of *Tahf*)

EXAMPLES:

■ Sometime VOWEL to Voiceless VOWEL	YaGOAN	to AGONY	יגון
■ LIPS	BILABIAL SHIFT	ABBa	to PAPA אבא
■ THROAT	GUTTURAL SHIFT	QeReN	to HORN קרן
■ TOOTH RIDGE	DENTAL SHIFT	AReTS	to EARTH ארץ
■ NOSE	NASAL SHIFT	IYLaN	to ELM אילן
■ ROLLING TONGUE	LIQUID SHIFT	[K]HOAR	to HOLE חור
■ WHISTLING	FRICATIVE SHIFT	SHaQeL	to SCALE שקל

Second, **METATHESIS** *scrambled* ROOT WORDS: **positions 1-2-3 of ROOT LETTERS swapped places in traceable patterns, even Reversals.** (Reversals are most common with two-letter root words.)

EXAMPLES:

- **DEGREE** **M132 (easiest)** from **DaRGaH** (step, rank) דרגה
- **WORD** **M231** from **Da[V]aR** (word) דבר
- **BEAUTY** **M213** from **TSiBHeeY** (beautiful) צבי
- **MERCY** **M312** from **RaK[H]eM** (mercy) רחם
- **TERRA** **M321 (Reversal)** from **AReTS** (earth) ארץ

Third, during millennia of language corruption, *survival of the easiest* caused **NASALIZATION** (inserting extra Ns or Ms).

EXAMPLES:

- **AND** [O]aWD (furthermore) עוד
- **SLING** SHaLaK[H] (to send off, release, throw) שלח
- **SWAMP** \$OOF (German *sumpf*, a marshy swamp, bog) סוף
- **BRONZE** BaRZeL (bronze, brass) ברזל

With Edenics we can now know WHY words mean what they do.

Why is a Spanish firemen a *bombero*, and a French one a *pompier*? Because firemen **PUMP** water, and history's first **PIPE** was the **ABOOBH**, אבוב (hollow reed). See **NASALIZATION** and **BILABIAL SHIFTS** above.

Languages everywhere are ultimately from Babel.

The migrating Native Americans "remembered" the *Edenic* word **צחן** **TSaK[H]aN** (stink), scrambled a bit at Babel, when they encountered a black and white stinker. *English* got **SKUNK** from Native Americans. To hear **STINK** or **SCANDAL** (a big stink), apply **metathesis M132** to **TSaK[H]aN**.

Edenicists apply fundamentals of **Sound-Based LETTER SHIFTS**, **METATHESIS**, and **NASALIZATION** to search for *Edenic* ROOTS.

Only a few hundred words are as simple as Japanese **SaMuRai** (the emperor's royal guard) from **SHOMeR** שומר (guardian). The vast majority of words are as hard to get as: (1) English **LONG** from *Edenic* **ARoaKH** ארך (long)—the initial Aleph is dropped, the Resh shifts **liquids** to L, and an N is added (**nasalization**); or (2) English **WORD** (from German *vort*) from *Edenic* **Da[V]aR** דבר (word, thing)—where **metathesis M231** and a **bilabial shift** are needed.

Transliteration Key

א	Aleph	A, or any Upper CASE VOWEL
ב	Bet/ Bhet	B or BH or [V]
ג	Gimel	G or J
ד	Dalet	D
ה	Hey	H
ו	Vav	V,W,OO or OA
ז	Zayin	Z
ח	Het	[K]H or K[H]
ט	Tet	DT
י	Yod	Y
כ/ך	Kahf/Khaf	K or KH

ל	Lamed	L
מ/ם	Mem	M
נ/ן	Noon	N
ס	Samekh	\$ (like "S")
ע	Ayin	Bracketed UPPER CASE [VOWEL] or GH
פ/ף	Pey, Phey	P, PH or F
צ/ץ	Tsadi	TS (always read "ST" in European)
ק	Koof	Q
ר	Resh	R or WR
ש	Shin or Sin	SH or S
ת	Tahf, Thaf or Sahf	T,TH or (S)

Bet/Bhet, Kahf/Khaf, Pey/Phey, Shin/Sin, and Tahf/Thaf/Sahf are variants. Hebrew script uses diacritical marks, or "dots," to indicate whether, for example, the letter sounds like an aspirated B or a passive BH/V.

Five letters have **end forms**: כ-ך מ-ם נ-ן פ-ף צ-ץ

UPPER or lower Case:

- 1) Anything in lower case is not a ROOT LETTER but added to replace vowels and aid pronunciation.
- 2) CONSONANTS are capitalized, and are the integral part of Edenic roots.
- 3) VOWELS are in lower case, indicating they are merely added to help one pronounce the word.

EXCEPTIONS

- 1) Vav is a V or W as a consonant, but can serve as the OO or OA vowel sounds as in ROOT and BOAT. Such vowels from a Vav in Edenic word are in upper case.
- 2) A Yod will often render an "eeY" sound. If in the Hebrew, the "Y" is in upper case.
